EDUCATION

Vishwakarma Government Engineering College   Ahmedabad, Gujarat
Bachelor in Electronics and Communication Engineering   *July. 2019 – May 2023*

Little Flower School   Ahmedabad, Gujarat
Higher Secondary School in Science Stream   *April 2018 – March 2019*

PROJECTS

InShare File Sharing | *HTML, CSS, Javascript, Node.js, Express.js, MongoDB* [-Link](#)   July 2022 – July 2022
- Build an Instant File Sharing Application using Vanilla Javascript in the front-end and Node.js, Express.js, and MongoDB in the back-end.
- Used back-end as a Microservice and deployed it over Heroku while front-end is hosted over Github pages.
- Add features like Email service by using SMTP. Add cors on the server-side to give access to cross-origin requests.

Portfolio Website | *HTML, CSS, Javascript, SCSS* [-Link](#)   June 2022 – June 2022
- Build a static portfolio website using HTML, CSS, and Javascript.
- Learn about web designing, styling, and in-depth CSS Grid and FlexBox. Apply to media query to make it compatible with almost all devices.
- Hosted it to Github pages and redirected it to a custom domain.

Color Picker Chrome Extension | *HTML, CSS, Javascript, JSON* [-Link](#)   May 2022 – May 2022
- Build a Chrome Extension that helps us in finding any pixel color from anywhere on the screen whether it is a browser or not.
- It is a Simple Extension for finding hex color code. The picked color will get copied to the clipboard.
- Learn about various browser APIs to get tab access, get color code, and the copied function.

Cricket Match Information Scrapper | *Javascript, Node.js* [-Link](#)   Oct. 2021 – Oct. 2021
- Scrapped World-Cup 2019 Cricket match data from the CricInfo website and extracted it in the form of excel and pdf.
- Processed raw web data into a different viewable format so that it can be used to analyze each team's performance.

- Build this project to learn node.js and to explore various npm libraries.

VURL - URL Shortener | *HTML, CSS, Javascript, Python* [-Link](#)   Aug. 2021 – Aug. 2021
- Build Url shortener using Html, CSS, and Javascript in front-end and Python's Django in the Back-end.
- VURL can be used to shorten any Url along with this it helps in stating the number of the total user that uses short Url.

EXPERIENCE

Teaching Assistant   Oct. 2019 – Nov. 2019
